SUMMARY

- Ph.D. candidate (expected to graduate at Fall 2024) in the Department of Electrical and Computer Engineering, University of Minnesota.
- Research experiences: AI in healthcare (powered by computer vision, image/video analysis), trustworthiness of AI/deep learning models, machine learning, deep learning, computer vision, 3D assets generation and 3D reconstruction.
- Programming language: Python, Matlab (proficient); C++, C, SQL (have experience).

EDUCATION

Ph.D, Electrical and Computer Engineering

University of Minnesota, Twin Cities, Minneapolis, MN

Master of Science, Electrical Engineering

Chalmers University of Technology, Göteborg, Sweden

Bachelor of Engineering, Electrical Engineering Shanghai Jiao Tong University, Shanghai, China Sep. 2011 — Jun. 2015

Sep. 2015 — Jun. 2017

Sep. 2018 - Jun. 2024 (expected)

RESEARCH EXPERIENCE

Graduate Research Assistant

Dec. 2020 - Present

Advisor: Ju Sun

Department of Computer Science and Engineering

- Trustworthy AI:
 - Robustness (adversarial and natural) with a focus in computer vision.
 - Constrained deep learning problems, contributor of the constraint deep-learning optimization solver PyGranso (see https://ncvx.org/).
 - Selective classification to approach deployable AI systems for real-world high-stakes applications.
- AI in healthcare (powered by computer vision):
 - Video-based automatic tic (Tourette Syndrome) detection for diagnostic assistants. I am the major contributor of the machine learning algorithm (video analysis and motion detection). This project (with preliminary result delivered) will receive in total 3.5 million US dollars research grant funded by National Institutes of Health (NIH) from 2023 to 2027.
 - Automated hearing report (audiogram) reader (ongoing research, preliminary result has outperformed similar functions in iPhone in our local hospital dataset).

Graduate Research Assistant

Sep. 2018 - Dec. 2020

Advisor: Changhyun Choi

Department of Electrical and Computer Engineering

- Robotics:
 - Robotic (visual) perception and manipulation problems via deep learning/reinforcement learning.

WORK EXPERIENCE

Applied Scientist Intern

May. 2023 - Sep. 2023

Mentor: Prateek Singhal

Amazon

• 3D reconstruction of realistic faces and generating natural 3D talking avatars with realistic look.

Mentor: Vivek Yadav Amazon

• Generating realistic head motions for virtual animated avatar based on audio input. The deliverable has been deployed into Amazon product in virtual conference platform.

POSTERS

• Midwest Machine Learning Symposium

May. 2023

- Toward trustworthy AI robustness and beyond
- When Deep Learning Meets Nontrivial Constraints

HONORS & AWARDS

• Cisco Research Graduate Awardee

Jan. 2022 — Sep. 2022

• Excellent Master Thesis Award, Department of Electrical Engineering, Chalmers Jun. 2017 (Thesis link)

• Chalmers 'Advancez' Scholarship for international students

Aug. 2015 — Jun. 2017

Professional Activities & Service

Journal Reviewer

• IEEE Robotics and Automation Letters (RA-L 2020).

Conference Reviewer

- Conference on Neural Information Processing Systems (NeurIPS, 2023)
- IEEE/RSJ International Conference on Intelligent Robots and Systems (IROS, 2020).
- IEEE International Conference on Robotics and Automation (ICRA 2019, 2020, 2021).

Conference Organizer

• Assistant Session Chair for the 2023 SIAM International Conference on Data Mining (SDM23).
